

Metal-textile structures, floors and furniture for events

# Quality at the service of your performance

For more than 22 years, in the heart of Alsace near Strasbourg, ATS has established itself as the leader in demountable floors and as an innovative player in the manufacture of metal-textile structures.

A complete range of marquees, floors and furniture for events.

Eric Loux, founder and managing director of ATS

Always listening...

#### **Enthusiasm**

Each project is unique and we look for the most suitable solution.

#### Audacity

Think outside the box to find the most innovative solution for you.

#### Integrity

This is a core value of the company. It resides in each of our employees, fostering the honesty and the understanding of our strengths and weaknesses.

#### Courtesy

On a daily basis, we strive to demonstrate professionalism, friendliness and courtesy.

#### For 22 years

Our customers' requirements lead us to manufacture reliable, robust and competitive systems to meet specific demands, tailor-made projects that comply with safety standards.

#### All-in-one solutions

The evolution in the use of the mobile structure has led us to offer complete turnkey solutions.

Whether for events, storage or any other use, we offer the structure equipped with flooring, cladding, glass facades, doors, etc.

#### Innovation

ATS designs the majority of its products within its own design office. Strict control of the production process guarantees constant product quality.

The flexibility of our company also allows us to produce small batches, or even single parts adapted to the needs of our customers.

#### Reliable systems

ATS products are designed for intensive use. Reliable and sturdy, they retain their good looks even after multiple uses.

#### Time saver

Our temporary solutions are easy to assemble and disassemble even

by unqualified personnel thanks to our assembly instructions and our technicians who are always ready to answer your questions.

#### **Certified products**

All products comply with European standards. NF environmental standards and TUV certification for floors and furniture.

The wood treatments and paints for the bases are guaranteed to be harmless.

#### Tailor-made racks

Custom-made racks facilitate transport, loading, unloading and storage products. These racks, made galvanized steel, accommodate: canvas coverings, floors, frames and folding furniture.

Creation of racks according to your needs.

#### **Environmentally friendly products**

All our wood is of European origin, labeled, PEFC certified and from ISO certified factories. The woods come from replanted forests.

#### Investment

ATS has invested in a new additional machining center, bringing the number of machines to 3, thus enabling us to respond even more quickly to our customers' demands.

# MARQUEES FLOORS

- Reliable and robust products suitable for intensive use
- Modular system adaptable to all configurations in width and length
- ► Different floor qualities

### Different types and qualities of wood

### Fir flooring

clear

21/22 mm thick, wood: fir, surface treatment: planed impregnated, weight: approx. 12 kg/m², battens on each board, grooving on both sides

brown/orange

autoclave

# Three-ply spruce flooring

21 mm thick, wood: spruce, surface treatment: hot-impregnated varnish, weight: approx. 10.5 kg/m², battens autoclave treatment class III, grooving on both sides

Triple-ply spruce "KNV" mat dark brown

Triple-ply spruce "FIRST" light brown mat (quality B/C+)

Triple-ply spruce "TERRACOTTA" pale brown

Triple-ply spruce
"TERRACOTTA VIP"
shiny pale brown

# Phenolic coated flooring

21 mm thick, wood: plywood **ALL BIRCH**, non-slip coating 170 g/m², European sourcing.

Triple-ply flooring with double comb autoclave

21 mm thick, wood: spruce, 3 square cuts, autoclave treatment Class III Brown

### Floor coating line

We offer you a solution that allows us to master the surface treatment of floors but also volumetric elements.

We are now able to respond quickly to your varnish needs and also to the renovation of your floors.

# Different types of flooring

### Cassette floor on frame

- composed of a male and a female profile
- filling of the cassette with 21 mm three-ply spruce wood
- wood/aluminum assembly by screw + lock nut + self-tapping screws
- with or without central reinforcement
- dimensions: 2 m x 1 m, 2.5 m x 1 m, 3 m x 1 m

# Self-weighted cassette

- galvanized steel and UPN 100 frame
- square tube crossbeams 60 x 2 mm
- equipped with fork guides
- holes for fixing inserts and plates
- three-ply spruce flooring
- thickness: 21 mm

- surface treatment: hot-impregnated varnish
- different dimensions available:
  - 3 m x 1.5 m
  - 4 m x 2 m
  - 5 m x 2.5 m
  - 10 m x 2.5 m

The advantage
of the cassette
floor self-weighted ATS
is to allow an assembly
of a structure without any additional
means of anchoring or ballast,
holding being ensured
by the own weight of the assembly

#### Examples of achievements

#### Cassette in 10 x 2.5 m

# FLOORS FRAMES

- ▶ Double frame with or without aluminum rail
- Simple layer frame
- ► Dance floor
- ► Canopy floor, on the ground installation
- ► Aluminum rails
- Accessories

All of our floors are CTS standards suitable for public use. (Resistance: 500 kg/m2)

# Different types of frames

### Double layer frame with aluminum rail

- 1st layer: galvanized steel tube stringers
- 2nd layer: galvanized steel tube crossbeams and anodized 15µ aluminum rail
- fixation plates and accessories included

# ATS double layer frame

# (without aluminum rail)

- 1st layer: galvanized steel tube stringers
- 2nd layer: galvanized steel tube crossbeams
- fixation plates and accessories included

# Simple layer frame

- One layer: galvanized steel tube crossbeams and anodized 15µ aluminum rail
- fixation plates and accessories included

#### Transport and storage

ATS manufactures custom-made racks, especially adapted to the transport and storage of frames. The galvanized steel racks are equipped with a fork guide on each side.

#### Dance floor

- Edging with anodized 15µ aluminum rail
- Corner connector, straight sleeve, finishing rail

# Corner connector

Aluminum dance flooring

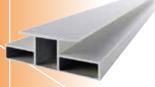

• Aluminum dance flooring

#### Aluminum rails for flooring

Clear anodized aluminum profile Use: laying on 21 mm flooring Dimensions: 150 x 44 mm

Clear anodized aluminum profile Use: laying on double layer frame or simple layer, for 21 mm flooring

Dimensions: 150 x 71 mm

Clear anodized aluminum profile Use: aesthetic finish and barrier-free access Dimensions: 157 x 44 mm

# Canopy floor without frame - on the ground installation

- three-layer spruce flooring, 21 mm thick
- floor laying/indoor and outdoor use, simple and quick to install.
- battens of 45 x 45 mm (CANOPY construction)
- dimensions: 0.5 x 0.5 m, 1 m x 0.5 m, 2 m x 0.5 m, 3 m x 0.5 m, 4 m x 0.5 m

battens 45 x 45 mm

installation example with folding tent PRO

# Floors and frames

#### ▶ Floors

#### Batten: $600 \times 58 \times 21$ mm

- calibrated
- two chamfers
- lumber wood
- autoclave treatment class III

#### ATS metal plate

- dimensions: 50 x 80 mm, thickness 3 mm
- with 6 countersunk holes for countersunk screws Ø 5 mm

#### Floor stop

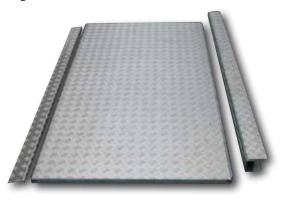

- zinc-plated steelprevents a self-support-
- prevents a self-supporting floor from slipping out of its frame

#### Ramps, ramp nose, long section and gable adapters, guardrails

- stable and solid non-slip aluminum sheet metal ramp
- galvanized steel frame

People with reduced mobility access

#### Corner connector and sleeve

#### for dance flooring

Gable adapter

Long section adapter

Ramp with guardrail

# Stays and adjusting rods

- in galvanized or zinc-plated steel
- different fixed heights available
- optional adjustable system (20 cm additional wedging with nut adjustment)

#### Twisted steel post

- in forged steel twisted TOR Ø 25 mm
- - available lengths:
    - 500 mm
    - 800 mm
    - 1200 mm
    - 1500 mm

#### Optional: Curtains 3 x 3 m Ballast weight 30 kg

Short-term installation. From 70 km/h wind speed, we advise dismantling the structure. Weights according to dimensions:

3 x 3 m: 90 kg/foot 3 x 4.5 m: 115 kg/foot 3 x 6 m: 125 kg/foot 4 x 4 m: 150 kg/foot 5 x 5 m: 235 kg/foot

CTS standard according to the decree of 23 January 1985

# TARPAULINS

- ► TRANSLUCENT tarpaulins
- ► CRYSTAL tarpaulins
- ► OPAQUE tarpaulins

Roof tarpaulins, curtains, gable ends

All our tarpaulins are made in Europe.

#### **Translucent**

Allows light rays to pass through while diffusing them but does not allow objects to be distinguished.

• M2 fireproof PVC white 620 g/m<sup>2</sup>

# TRANSLUCENT white curtain 3 m, 4 m, 5 m - H 2.20 m, 2.50 m, 3 m

- closing by central exterior lacing
- side bolt ropes
- tension rod sheath
- rot mudflap
- curtain loops

#### Roofs tarpaulins

PAGODE, DOME, PYRAL, DIAMANT Two-slope structure, gable ends, side curtains, complete gable.

OPTION: with 50/100th crystal window

### Crystal

• transparent fireproof tarpaulin M2 50/100th

#### Curtain CRYSTAL 3 m, 4 m, 5 m, H 2.20 m, 2.50 m, 3 m

- white translucent frame 620 g/m<sup>2</sup>
- closing by central exterior lacing
- side bolt ropes
- tension rod sheath (white translucent)
- anti-rot mudflap (white translucent)
- curtain loops

#### Options:

- tensioning bar for pagode curtain:
  3 x 3 m, 4 x 4 m, 5 x 5 m
- pagode curtain rod support bracket

# Opaque

#### Does not allow the passage of light rays.

• M2 PVC white 765 g/m<sup>2</sup>

#### Solid curtain white 3 m, 4 m, 4.5 m, 5 m, 6 m for PRO folding structure with or without door

- white tarpaulin fireproof M2 520 g/m<sup>2</sup>
- roof and curtain connection by velcro 50 mm
- 4-points attachment to the pole

#### Roofs tarpaulins

PAGODE, DOME, PYRAL, DIAMANT Two-slope structure, gable ends, side curtains, complete gable.

#### Options:

- white gutter for PRO folding structure 3 m, 4 m, 4.50 m, 5 m, 6 m
- ballast weight: 30 kg for PRO folding structure

# OPAQUE CURTAIN 3 m, 4 m, 5 m, H 2.20 m, 2.50 m, 3 m

- closing by central exterior lacing
- side bolt ropes
- tension rod sheath
- anti-rot mudflap
- curtain loops

# CLADDING

- Glass panel
- ▶ Laminated panel
- Sandwich panel
- ▶ PVC panel
- Wooden panel
- ► Industrial panel

# ► Continuous cladding

# Glass cladding panel

- thickness 30 mm I. 1000 mm x h. 2700 mm
- frame in aluminum profile
- filling: STADIP 33/2 glazing
- PVC connecting tab on one side

# Laminated cladding panel

- thickness 30 mm I. 1000 mm x h. 2700 mm
- aluminum profile on both lengths
- filling: PVC sandwich panel 24 mm M2
- PVC connecting tab on one side
- white color

# Sandwich panel

- thickness 30 mm I. 1000 mm x h. 2700 mm
- male/female assembly system
- white color (other colors on request)
- European manufacturing

# Wooden cladding

# Wooden cladding panel

- thickness 30 mm I. 1000 mm x h. 2700 mm
- frame in aluminum profile
- filling: 21 mm wood, Northern spruce,
- A1<mark>0F cladding, s</mark>quare cut, Class III autoclave treatment
- PVC connecting tab on one side
- other sizes available

# Industrial cladding for storage and long-term buildings

# Steel panel

We offer a wide variety of galvanized and pre-painted steel cladding profiles.

The panels can be ribbed, sinusoidal, trapezoidal, all in various colors and thicknesses to meet all your needs.

Our range of profiles is suitable for all agricultural, industrial, residential and tertiary applications.

#### Examples of achievements:

# DOORS AND FRAMES

- ► Solid or glazed aluminum door
- ► Service door
- Solid or glazed fixed frame
- Door impost
- ► Sliding door
- ► Power-driven door
- Door accessories

# ▶ Solid or glazed aluminum door

# ATS aluminum double door

- colors: painted white (RAL9010) or gray (natural anodized)
- overall dimensions :
  - L. 2040 x H. 2195 mm
  - L. 2410 x H. 2140 mm
- with or without cross-brace
- top infill: STADIP 33/2 glazing, 6 mm Plexiglas or 24 mm sandwich panel
- with or without crossbeam
- bottom infill: sandwich panel 24 mm
- a 1-point anti-panic on service door
- a built-in fireman cremone bolt with rotating handle on semi-fixed hinged panel
- ATS doorstep
- optional: 2-point anti-panic, door closer, square oculus (diamond or circular possible)

# ▶ Door with canopy

# ▶ Service door

▶ Solid or glazed fixed frame

# ► Door impost

# ▶ Sliding door

- aluminum/steel frame
- filling: 24 mm insulation panel 24 mm two-sided fireproof M2 white color
- dimensions: different formats
- sliding on roller and omega rail
- ground guide plate
- floor latch locking system
- incl. long section or gable mounting bracket

# ▶ Power-driven door (metal roller blind)

- solid roller blind, 10/10th, galvanized steel, with maximum rigidity and meets the highest safety requirements
- dimensions: different sizes available, please contact us
- locking: European barrel lock with 2 anchor points on end slat
- push button operation
- 20 cycles/day

- 2 braked swiveling wheels
- 2 fixed wheels

Table mounted on trolley

# MACHINING CENTER

# Structure

Investment in a new machining line

To meet the requirements of an increasingly competitive market, ATS invests in a high performance machine.

# Machining center

This 4-axis CNC gantry machining center is designed to drill, mill and thread at any angle from  $-90^{\circ}$  to  $+90^{\circ}$  on bars or parts made of aluminum, PVC, light metal and steel up to 2 mm thick. The moving part of the machine consists of a power-driven double gantry on a high precision gear. The new technopolymer covering has been designed to combine maximum functionality, accessibility, soundproofing and lighting with safety and ergonomics.

It is able to perform even heavy operations with excellent, fast and precise results. The 12-chamber tool magazine integrated in the mobile portal has two special positions for accommodating a saw blade with a maximum diameter of 250 mm and an angular machining unit.

The machine can be used in double dynamic operation with the version with clamping and handling system. It has a laser zone scanner for innovative access control to the machine, which increases safety and standards for the operator and machine interface.

# Our production tools

ATS has 2 productionsites, one site for the aluminum machining and the second for the flooring.

We are expanding our production range, with 3 machining centers, 1 double-head numerical control unit and a number of drill presses.

We also have a 2 belt sanding machine, ALU and STEEL welding stations and a complete metal workshop.

Our design office, with 4 people, is equipped with CAD/CAM software and INVENTOR licenses, which allows us to meet your specific requests, custom projects and comply with safety standards.

Thanks to this investment, we are now able to respond even more quickly to your needs.

New achievements..

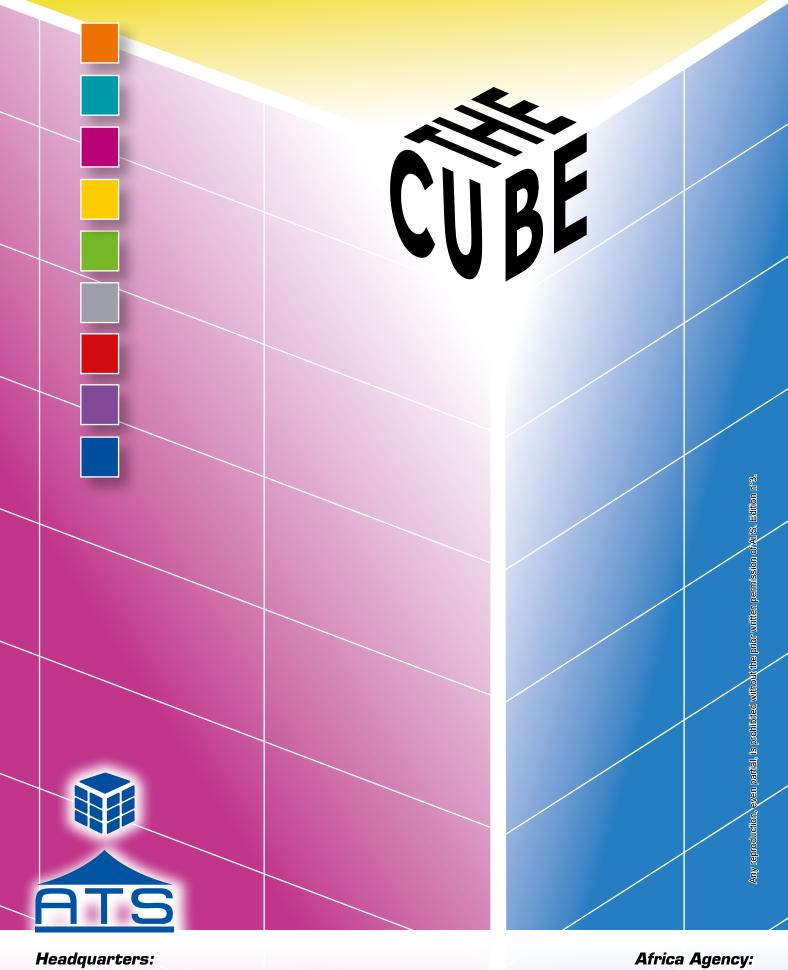

# Trust our experience

Marquees, floors, customized furniture, mobile structures and event installations, we will offer you the the most efficient solutions and the most adapted to all your requirements.
